

HELP TO REDUCE HOME FUEL BILLS

Are you worried about your gas or electricity bill...or both?

How do you know that you are getting the best deal from your supplier?

There are independent websites such as www.uswitch.com or www.energyhelpline.com to help you find the best deal. You can also change supplier online. Please note that in some circumstances with some heating systems switching may not be possible.

Some energy suppliers have special discounts on fuel charges, for example to help pensioners, the disabled and low income households. A summary of some of the schemes available is noted in the table below. If you are with a supplier not detailed below, please contact them and ask about what discounts or "Social Tariffs" they might offer.

If you want informal and confidential advice on with problems with fuel bills or any other debts such as loans, credit cards, rent arrears, council tax etc; please contact our office who can refer you for help.
